

Abdullah Rather

PHP Backend / Full-Stack Developer

abdullahrather19@gmail.com | +4915560132548 | Cottbus, Germany | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PHP Backend / Full-Stack Developer with 5+ years of experience building enterprise web applications, REST APIs, internal platforms, and database-driven business systems. Strong in PHP, Laravel, Yii, Symfony, MySQL/MariaDB, Docker, CI/CD, and API integrations. Experienced in legacy modernization, reporting systems, process automation, and maintainable production software.

Technical Skills

Core Technologies

PHP, Laravel, Yii, Lumen, Symfony, MySQL, MariaDB, PostgreSQL, REST APIs, OOP, Clean Code, Docker, Git, GitHub Actions, PHPUnit

Frontend

JavaScript, TypeScript, React, HTML5, CSS3, Bootstrap, AJAX, Sass/SCSS

Additional Exposure

Python, Flask, FastAPI, MongoDB, Linux/CentOS, WordPress, Livewire, Tailwind CSS

Experience

APS Services GmbH | Neckarsulm, Germany

Software Engineer

04.2024 – Present

- Further developed and maintained a comprehensive enterprise management system supporting customers, tickets, offers, orders, invoicing, project workflows, employee time tracking, and reporting.
- Built REST integrations, including DATEV-related workflows, and contributed to secure authentication, role-based access control, and business-critical internal process automation.
- Developed reporting, export, and dashboard functionality while improving maintainability, usability, and performance through code optimization and database query refinement.
- Contributed to modernization of legacy application areas through structured backend logic, refactoring, testing, and continuous integration practices.
- Built responsive internal interfaces and AJAX-based workflows to support efficient day-to-day operations across multiple modules.

Qualven Pvt Ltd | Islamabad, Pakistan

Technical Team Lead – Onsite

11.2021 – 04.2024

- Led a team of five while remaining deeply hands-on in the design, development, testing, deployment, and maintenance of PHP-based business applications.
- Built backend logic, integrated APIs, implemented frontend-backend workflows, and contributed directly to new features across multiple web applications.
- Worked on database design, schema changes, optimization, and data handling to support evolving backend requirements and newly introduced business features.
- Managed deployments and application updates across hosting environments and Linux-based local network systems, including SSH-based workflows and production support.
- Maintained coding standards, code reviews, documentation, and secure, maintainable implementation practices while resolving technical blockers and supporting reliable software delivery.
- Collaborated with clients, management, and internal stakeholders to translate business requirements into practical technical solutions.

The Science School | Islamabad, Pakistan

Software Engineer – Remote

04.2022 – 04.2024

- Led the development and maintenance of a centralized Education Management Information System supporting student, staff, finance, and user administration workflows.
- Managed relational database structures, backend logic, and secure access flows with strong emphasis on data integrity, reliability, and maintainability.
- Implemented authentication, authorization, and role-based access control for administrators and staff across multiple modules.
- Improved system performance, security, and compatibility through structured upgrades, infrastructure improvements, and ongoing application refinement.

Qualven Pvt Ltd | Islamabad, Pakistan

Technical Intern

01.2021 – 07.2021

- Contributed to full-stack feature development across PHP backend and HTML/CSS, JavaScript, and Bootstrap frontend components.
- Supported deployments, documentation, maintenance, user training, and internal/client presentations.

Languages

English C1 | German A2 and Improving | Urdu Native

Education

Brandenburg University of Technology Cottbus–Senftenberg | Cottbus, Germany

M.Sc. Artificial Intelligence

04.2024 – Present

IQRA University | Karachi, Pakistan

B.Sc. Computer Science

08.2016 – 05.2021

Enterprise Management System

- Designed and implemented a comprehensive enterprise management system, driving core business processes including Projects, Documents, Orders, Offers, Time, Employees (Internal/External), Customers, and Tickets management.
- Integrated secure, real-time financial data processing with DATEV, generating ZUGFeRD-compliant XML invoices alongside PDF.
- Built comprehensive reporting system with CSV/PDF export functionality for each module.
- Designed dynamic, multi-language (German/English) client-side interfaces utilizing AJAX for seamless content loading and improved user experience.
- Implemented robust security architectures, including CSRF prevention, XSS protection, and secure authentication workflows.

Education Management Information System (EMIS)

- Developed a centralized web-based information system utilizing PHP, JavaScript, and HTML/CSS to manage complex institutional data.
- Developed modules such as Student (Attendance, reports, profiles, sessions, classes, and sections), Finance (financial transactions and reporting) Staff (Oversaw teacher profiles, schedules, and responsibilities) User (Secured logins for teachers and admins with role-specific access).
- Created secure Parents Portal for documents submission and progress monitoring.

Donor Management System (DMS)

- Developed a scalable Full-Stack Donor Management System utilizing Laravel for the backend architecture and React for the user facing interfaces.
- Implemented a secure Donor Portal allowing users to autonomously manage contributions and track data.
- Ensured clean separation of concerns between the frontend React application and the backend PHP/Laravel services.
