

Abdullah Rather

PHP Backend / Full-Stack Developer

abdullahrather19@gmail.com | +4915560132548 | Cottbus, Germany | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PHP Backend / Full-Stack Developer with 5+ years of experience building enterprise web applications, REST APIs, internal platforms, and database-driven business systems. Strong in PHP, Laravel, Yii, Symfony, MySQL/MariaDB, Docker, CI/CD, and API integrations. Experienced in legacy modernization, reporting systems, process automation, and maintainable production software.

Technical Skills

Core Technologies

PHP, Laravel, Yii, Lumen, Symfony, MySQL, MariaDB, PostgreSQL, REST APIs, OOP, Clean Code, Docker, Git, GitHub Actions, PHPUnit

Frontend

JavaScript, TypeScript, React, HTML5, CSS3, Bootstrap, AJAX, Sass/SCSS

Additional Exposure

Python, Flask, FastAPI, MongoDB, Linux/CentOS, WordPress, Livewire, Tailwind CSS

Experience

APS Services GmbH | Neckarsulm, Germany

Software Developer

07.2024 – Present

- Architected the backend development of a comprehensive enterprise management system, processing complex workflows across 8+ distinct business modules including invoicing, ticketing, and time tracking.
- Engineered secure REST API integrations for DATEV-related financial workflows, implementing robust OAuth/JWT authentication and role-based access control (RBAC).
- Optimized complex MySQL queries and database structures to eliminate N+1 bottlenecks, significantly accelerating dashboard load times and data export generation.
- Modernized legacy application components by introducing structured OOP logic, comprehensive refactoring, and automated testing pipelines.
- Delivered responsive internal interfaces using AJAX workflows, streamlining daily operational efficiency for enterprise users.

Qualven Pvt Ltd | Islamabad, Pakistan

Technical Team Lead – Onsite

11.2021 – 04.2024

- Directed a cross-functional technical team of five, driving both architectural design and hands-on backend development for scalable business applications.
- Architected RESTful APIs and integrated robust frontend-to-backend data pipelines, delivering critical new features across multiple production systems.
- Designed and tuned relational database schemas, handling large data volumes while maintaining strict data integrity and high performance.
- Administered end-to-end deployment cycles across Docker and Linux/CentOS environments, establishing reliable CI/CD practices and production stability.
- Enforced strict code quality through comprehensive code reviews, technical documentation, and test-driven development methodologies.
- Partnered with clients and internal stakeholders to translate complex business requirements into practical, deployable technical solutions.

The Science School | Islamabad, Pakistan

Software Engineer – Remote

04.2022 – 04.2024

- Engineered a centralized Education Management Information System from scratch, supporting daily operations across student, staff, and financial modules.
- Structured complex relational databases and secure access flows, ensuring zero data loss and high availability for institutional records.
- Integrated strict role-based access control (RBAC) and authentication protocols to secure sensitive administrative and financial data.
- Executed structured infrastructure upgrades and application refinements, resulting in enhanced system performance and compatibility.

Qualven Pvt Ltd | Islamabad, Pakistan

Technical Intern

01.2021 – 07.2021

- Assisted in full-stack feature delivery, writing robust PHP backend logic and responsive frontend components.
- Facilitated system deployments, technical documentation, and client-facing presentations.
